Smartop Succeeds Where Other Covers Fail

For more than fifty years, spa owners have longed for an alternative to the ever-failing vinyl cover that becomes water-logged, develops mold and odor, requiring regular replacement that is costly and burdensome.

With a chic and stylish design that is effortless to operate, durable and long-lasting, Smartop is the only spa cover that is hassle- and maintenance-free, providing you the spa ownership experience you expect and deserve.

The Spa Cover You Deserve

- No maintenance
- Zero water absorption
- Dual integrated cover lift system
- Durable and strong
- Exclusive heat retention system
- Safe and secure
- Attractive woven PVC skirt

Non-Water Absorbing Foam

Smartop is insulated with a specially formulated, non-water absorbing foam from Owens Corning which prevents sagging, weight gain, and mold growth.

DecoShield Protective Overlay

DecoShield is an elegant, textured polymer overlay that provides style AND protection to Smartop's rigid exterior shell. This durable, weather-resistant material is designed to withstand extreme heat and cold, snow, ice, pounding hail and intense UV rays.

Black Anodized Aluminum Trim

The durable, rustproof anodized aluminum trim adds the finishing touch to the aesthetically pleasing Smartop.

Automatic Snow and Ice Melt

Using heat transfer from the spa's water, Smartop's polymer panels automatically melt snow and ice off the Smartop ensuring your spa is easily accessible throughout the winter months.

Maintenance-Free

The protective DecoShield overlay makes cleaning quick and easy using simple dish soap and water. Smartop does not require costly conditioners or regular foam maintenance, making Smartop effortless and easy to own.

Performance Defined

Durable and Strong

Interlocking polymer panels, combined with anodized aluminum reinforcement channels, allow Smartop to support over 1,000 pounds.

Cost and Energy Savings

Smartop's heat retention capability (often referred to as R-value) has been tested against the highest-rated vinyl covers on the market, proving equal in performance. Unlike traditional vinyl covers, Smartop's heat retention remains constant throughout its lifespan due to the cover never becoming water-logged.

Dual Cover Lift System

The patented EAS Lift and Assist component, combined with a rear hydraulic cover lifter makes opening and closing Smartop feather-light and fingertip easy.

Safe and Secure

Functional and easy to use cover lockdowns with a combination padlock protect against unsupervised and unauthorized use of the spa.

Repairable and Replaceable Components

In the unlikely event Smartop becomes damaged, every component is repairable or replaceable. NEVER deal with the hassle of a costly cover replacement again.

SmartSeal

A layer of compression foam is applied to the underside of the cover, creating a tight seal that prevents heat from escaping the spa.

Smartop Upright

Privacy and Wind Block Built-In

The Smartop Upright creates a private, peaceful hot tub experience with its functional space saving design. Feather-light opening and closing, durability and a chic, sophisticated appearance make Smartop the perfect way to cover your spa. *Patent No. 8,813,275 | 9,689,172*

As little as 8 inches is required behind the spa and 3 inches on each side

Smartop Vanish XL

Panoramic View Included

Experience the world around you with the Smartop Vanish XL. Fingertip-light and velvet smooth opening and closing, make placing Smartop in a low position behind the spa effortless, creating a 360-degree view for you to enjoy during your hot tub experience.

Patent No. 9,574,361 | 9,689,172

A minimum of 28 inches is required behind the spa and 5 inches on each side

SMARTOP

Smartop transforms your spa and its surroundings into an eye-catching, sophisticated space. The contemporary, alluring design, coupled with performance and ease of ownership, make Smartop the new standard for spa covers.

Smartop spa covers are available in a variety of models to meet your specific needs. Whether it's a small two-person spa or a sizeable swim spa, Smartop fits spas that measure up to twenty feet.

If you have a spa with a unique shape or installation requirement, let us know, and we will work to design and build a Smartop to meet your needs.

Smartop Swim Spa

Easy Handling - On and Off

Available for spas up to twenty-feet, Smartop Swim Spa makes easy work of opening and closing the covers required for these larger spas. Available as an Upright, Vanish XL or Hybrid model (one Upright, one Vanish XL). *Patent No. 8,813,275 | 9,574,361 | 9,689,172*

The exclusive center bridge design where the two covers meet, creates a tight seal that holds the heat in the swim spa while preventing dirt and debris from entering the swim spa.

Every Smartop spa cover is custom made 100% in the USA per your design selections. Unique cover dimensions, corner radius size, plus color selection, result in a cover that fits properly and enhances the look of the spa and its surroundings.

How Well Does Smartop Retain Heat in the Spa? (R-value)

Heat retention is the primary goal of every spa cover. In side-by-side comparisons, Smartop has proven equal, or better than, the leading traditional foam covers in heat retention.

Because of its advanced design and use of specially formulated Owens Corning insulating foam, Smartop maintains high heat retention throughout its ENTIRE life span - a problem that has plagued the traditional foam cover since its invention.

Simply put, Smartop is unmatched in heat retention, helping your spa achieve maximum energy efficiency throughout its lifespan.

For extremely cold climates where maximum heat retention is of the highest priority - SmartShield 800 is the answer! Applied to the underside of the Smartop, this dense, soft-to-the-touch, black material has proven to increase the already energy-conscious Smartop by more than 20%. (Extra fees apply)

*Professional Service Industries Inc., a division of construction materials testing firm Intertek.

Smartop Cares About the Environment

More than one million traditional vinyl covers are discarded annually. Sadly, the foam insulating material used in the vinyl cover is not readily biodegradable. Research shows it takes as long as five hundred years for the foam material to decompose. Below are more concerning facts about extended polystyrene foam and its effects on Mother Earth:

- 25-35% (by volume) of landfills are comprised of polystyrene products (about 10 cu ft. of volume taken up for every 10,000 cups in landfill)
- 80% of extended polystyrene foam ends up in landfills and much of the remaining 20% in waterways (as per U.S. Environmental Protection Agency: 3 million tons of polystyrene produced in the U.S per year; 2.3 million tons end up in landfills, with much of the remainder finding its way into waterways)
- 18% of total coastal clean-up costs are attributed to polystyrene products

Smartop is the only spa cover designed and built as a non-disposable cover – one that will never negatively impact the environment - making Smartop not just a smart choice, but the responsible choice as well.

SMARTOP ®

3 Year Manufacturer Backed Performance Assurance Guarantee

Each cover is manufactured with superior materials and craftsmanship and meets or exceeds all ASTM safety standards for UL classification resulting in a product that is warrantied against defects in materials and workmanship. If your Smartop is found to be unserviceable due to defects in materials or workmanship within three years from date of purchase, replacement parts OR a replacement cover will be provided.

About Leisure Concepts

Leisure Concepts has been providing hundreds of thousands of satisfied homeowners quality products for over 25 years, making the company the #1 spa accessory manufacturer in the world. All manufacturing is completed in the USA in our 100,000 sq. ft. state-of-the-art facility allowing the strictest quality control and on-time delivery. Our goal is to provide quality products that offer many years of trouble-free ownership and 100% customer satisfaction.
